

Commitment to Development Index 2008

Italy

David Roodman and Cindy Prieto

The Commitment to Development Index (CDI) ranks 22 of the world's richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national effort in seven policy areas that are important to developing countries: aid, trade, investment, migration, environment, security and technology. This report reviews Italy's performance on the 2008 CDI.

Italy's 2008 CDI Performance

- Overall rank 2008: 20
 - Overall score 2008: 4.1
 - Change since 2003: +0.0
- (using 2008 methodology)

Italy ranks 20th overall in 2008. The Italian government scores below average on every component except for trade. Italy's overall score is brought down by a very small foreign aid program, poor donor practices (including the highest share of "tied" aid in the CDI), and the low number of unskilled immigrants entering from developing countries as a share of the Italian population.

Commitment to Development Index 2008

Italy's CDI Performance, 2003–08

Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes “tied” aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively uncorrupt recipients, and penalizes overloading poor governments with many small projects.

■ **Score: 1.5**

■ **Rank: 20**

Weaknesses

- Low net aid volume as a share of the economy (0.13%; rank: 21)
- Small amount of private charitable giving attributable to tax policy (rank as a share of GDP: 20)
- Large share of tied or partially tied aid (23%; rank: 17)
- Selectivity: large share of aid to less poor and relatively undemocratic governments (rank: 18)

Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries.

■ **Score: 5.7**

■ **Rank: 6**

Strengths

- Low barriers against textiles (5.4% of the value of imports; rank: 6)

Weaknesses

- High tariffs on agricultural products (38.7% of the value of imports; rank: 6)
- High agricultural subsidies (equivalent to 11.2% tariff; rank: 6)

Investment

Rich-country investment in poorer countries can transfer technologies, upgrade management and create jobs. The CDI includes a checklist of policies that support healthy investment in developing countries.

■ **Score: 4.8**

■ **Rank: 14**

Strengths

- Provides insurance against political risk for both domestic and foreign firms
- Employs tax treaties to prevent double taxation of corporate profits earned abroad

Weaknesses

- Does not actively participate in the Extractive Industries Transparency Initiative (EITI) or the Kimberley Initiative on blood diamonds
- Does not provide support for outflows of portfolio investment

Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

■ **Score: 2.7**

■ **Rank: 19**

Strengths

- Tuition for foreign students the same as for nationals

Weaknesses

- Only a small increase during the 1990s in the number of unskilled immigrants living in Italy (rank by share of population: 17)
- Bears small share of the burden of refugees during humanitarian crises (rank: 18)
- Small number of immigrants from developing countries entering Italy (rank by share of population: 16)

Environment

Rich countries use a disproportionate amount of scarce resources, and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

■ **Score: 4.7**

■ **Rank: 16**

Strengths

- Low greenhouse gas emissions rate per capita (7.9 tons of carbon dioxide equivalent; rank: 4)

Weaknesses

- Greenhouse gas emissions grew almost as fast as GDP in 1996–2006 (average annual growth rate/GDP, –0.4%; rank: 19)
- Large number of endangered species imports (rank: 22)

Security

Since security is a prerequisite for development, the CDI rewards contributions to internationally sanctioned peacekeeping operations and forcible humanitarian interventions, rewards military protection of global sea lanes, and penalizes arms exports to poor and undemocratic governments.

■ **Score: 4.9**

■ **Rank: 12**

Weaknesses

- Small financial and personnel contributions to internationally sanctioned peacekeeping and humanitarian interventions over last decade (rank by share of GDP: 14)
- High arms exports to poor and undemocratic governments (rank by share of GDP: 17)

Technology

Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

■ **Score: 4.0**

■ **Rank: 19**

Strengths

- Small share of government R&D expenditure on defense (0.1%; rank: 9)

Weaknesses

- Low government expenditure on R&D (rank by share of GDP: 17)
- Small tax subsidy rate to businesses for R&D (rank: 21)
- Allows patents on plant and animal varieties
- Offers patent-like proprietary rights to developers of data compilations, including those assembled from data in the public domain

Background Papers and Contributors

See “The Commitment to Development Index: 2008 Edition” by David Roodman, available at www.cgdev.org/cdi. The website also has background papers for each policy area: David Roodman on foreign aid, William R. Cline on trade, Theodore H. Moran on investment, Elizabeth Grieco and Kimberly A. Hamilton on migration, Amy Cassara and Daniel Prager on environment, Michael E. O’Hanlon and Adriana Lins de Albuquerque on security, and Keith Maskus on technology.

South Korea	22	0.6	0.0	4.6	0.9	2.3	1.7	6.8	2.4	n/a

This table ranks the 22 countries in the CDI, showing their scores in seven policy areas. A country's overall score is the average of its seven policy scores. The final column shows the change in each country's overall score since the CDI began in 2003, using 2008 methodology.

The CGD website (www.cgdev.org/cdi) has reports on each of the 22 countries in the CDI, as well as graphs, maps, spreadsheets and background papers.

The Commitment to Development Index is designed by the Center for Global Development, an independent think tank that works to reduce global poverty and inequality by encouraging policy change in the United States and other rich countries through rigorous research and active engagement with the policy community.

David Roodman, the architect of the Commitment to Development Index, is a Research Fellow at the Center for Global Development.
