

United Kingdom

David Roodman and Cindy Prieto

The Commitment to Development Index (CDI) ranks 22 of the world's richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national effort in seven policy areas that are important to developing countries: aid, trade, investment, migration, environment, security and technology. This report reviews the United Kingdom's performance on the 2008 CDI.

United Kingdom's 2008 CDI Performance

- Overall rank 2008: 6
- Overall score 2008: 5.6
- Change since 2003: +0.1 (using 2008 methodology)

The United Kingdom ranks 6th overall in 2008. It finishes first on the investment component, thanks to policies that promote healthy investment in poor countries. It also has a very strong environmental record from the perspective of developing countries. But the United Kingdom ranks low in the security component because of arms sales to undemocratic governments. British borders are also relatively closed to immigrants from poor countries.

Commitment to Development Index 2008

United Kingdom's CDI Performance, 2003-08

Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes “tied” aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively uncorrupt recipients, and penalizes overloading poor governments with many small projects.

■ **Score: 6.2**

■ **Rank: 6**

Strengths

- High net aid volume as a share of the economy (0.41%; rank: 6)
- No tied or partially tied aid (rank: 1)

Weaknesses

- Small amount of private charitable giving attributable to tax policy (rank as a share of GDP: 11)
- Selectivity: large share of aid to less poor and relatively undemocratic governments (rank: 13)

Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries.

■ **Score: 5.6**

■ **Rank: 8**

Weaknesses

- High tariffs on agricultural products (38.7% of the value of imports; rank: 5)
- High agricultural subsidies (equivalent to 12.9% tariff; rank: 14)

Investment

Rich-country investment in poorer countries can transfer technologies, upgrade management and create jobs. The CDI includes a checklist of policies that support healthy investment in developing countries

■ **Score: 6.3**

■ **Rank: 1**

Strengths

- Employs foreign tax credits to prevent double taxation of corporate profits earned abroad
- Particularly active in the Extractive Industries Transparency Initiative (EITI) and in the G-8 Anti-Corruption and Transparency Action Plan
- Provides support for outflows of portfolio investment

Weaknesses

- Political risk insurance also given to inefficient, import-substituting projects
- Negligent in identifying bribery and corrupt practices on the part of home country firms abroad

Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

■ **Score: 3.1**

■ **Rank: 17**

Strengths

- Bears large share of the burden of refugees during humanitarian crises (rank: 9)

Weaknesses

- Small increase during the 1990s in the number of unskilled immigrants living in the United Kingdom (rank by share of population: 18)
- Small share of foreign students from developing countries (61%; rank: 15)
- Small number of immigrants from developing countries entering the United Kingdom in 2006 (rank by share of population: 17)

Environment

Rich countries use a disproportionate amount of scarce resources and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

■ **Score: 7.5**

■ **Rank: 3**

Strengths

- Significant decline in greenhouse gas emissions rate in 1996–2006 (average annual growth rate/GDP, -3.4%; rank: 5)
- High gas taxes (\$1.01 per liter; rank: 4)
- Low fishing subsidies (rank: 4)
- Small number of endangered species imports (rank: 6)

Security

Since security is a prerequisite for development, the CDI rewards contributions to internationally sanctioned peacekeeping operations and forcible humanitarian interventions, rewards military protection of global sea lanes, and penalizes arms exports to poor and undemocratic governments.

■ **Score: 6.0**

■ **Rank: 8**

Strengths

- Significant financial and personnel contributions to internationally sanctioned peacekeeping and humanitarian interventions over last decade (rank by share of GDP: 1)
- Military ships stationed in sea lanes that are important to international trade (rank by share of GDP: 3)

Weaknesses

- High arms exports to poor and undemocratic governments (rank by share of GDP: 20)

Technology

Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

■ **Score: 4.4**

■ **Rank: 17**

Strengths

- High tax subsidy rate to businesses for R&D (rank: 11)
- High government expenditure on R&D (rank by share of GDP: 9)

Weaknesses

- Large share of government R&D expenditure on defense (2.1%; rank: 20)
- Allows patents on plant and animal varieties
- Offers patent-like proprietary rights to developers of data compilations, including those assembled from data in the public domain

Background Papers and Contributors

See “The Commitment to Development Index: 2008 Edition” by David Roodman, available at www.cgdev.org/cdi. The website also has background papers for each policy area: David Roodman on foreign aid, William R. Cline on trade, Theodore H. Moran on investment, Elizabeth Grieco and Kimberly A. Hamilton on migration, Amy Cassara and Daniel Prager on environment, Michael E. O’Hanlon and Adriana Lins de Albuquerque on security, and Keith Maskus on technology.

This table ranks the 22 countries in the CDI, showing their scores in seven policy areas. A country's overall score is the average of its seven policy scores. The final column shows the change in each country's overall score since the CDI began in 2003, using 2008 methodology.

The CGD website (www.cgdev.org/cdi) has reports on each of the 22 countries in the CDI, as well as graphs, maps, spreadsheets and background papers.

The Commitment to Development Index is designed by the Center for Global Development, an independent think tank that works to reduce global poverty and inequality by encouraging policy change in the United States and other rich countries through rigorous research and active engagement with the policy community.

David Roodman, the architect of the Commitment to Development Index, is a Research Fellow at the Center for Global Development.
