

Ireland

David Roodman, Julie Walz, and Tejaswi Velayudhan

The Commitment to Development Index (CDI) ranks 22 of the world's richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national effort in seven policy areas that are important to developing countries: aid, trade, investment, migration, environment, security and technology. This report reviews Ireland's performance on the 2011 CDI.

Ireland's 2011 CDI Performance

- Overall rank 2011: 9
- Overall score 2011: 5.5
- Change since 2003: +0.4
(using 2011 methodology)

Ireland ranks 9th overall in 2011. Ireland's strongest contributions to the development of poor countries come through its high-quality foreign aid program and its minimal arms exports to undemocratic governments. But as one of only three countries without a national political risk insurance agency, Ireland ranks near the bottom of the investment component. It is also one of the lowest CDI countries in government support for technology creation and dissemination and keeping borders open to agricultural trade with poor countries.

Commitment to Development Index 2011

Ireland's CDI Performance, 2003–11

Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes “tied” aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively well-governed recipients, and penalizes overloading poor governments with many small projects.

■ **Score: 8.6**

■ **Rank: 5**

Strengths

- Selectivity: large share of aid to poor and relatively well-governed recipients (rank: 7)

Weaknesses

- No tied or partially tied aid (rank: 1)
- High net aid volume as a share of the economy (0.54%; rank: 5)
- Large amount of private charitable giving attributable to tax policy (rank by share of GDP: 2)
- Selectivity: large share of aid to poor and relatively well-governed recipients (rank: 2)
- Prevents project proliferation; large average project size (rank: 2)

Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries.

■ **Score: 6.1**

■ **Rank: 18**

Strengths

- Low tariffs on textiles (6.0% of the value of imports; rank: 3)
- Low tariffs on apparel (6.0% of the value of imports; rank: 3)

Weaknesses

- High agricultural subsidies (equivalent to a tariff of 17.8% of the value of imports; rank: 22)

Investment

Rich-country investment in poorer countries can transfer technologies, upgrade management and create jobs. The CDI includes a checklist of policies that support healthy investment in developing countries.

■ **Score: 3.1**

■ **Rank: 21**

Weaknesses

- Does not provide political risk insurance through a national agency
- Lacks policies to fully prevent double taxation of corporate profits earned abroad
- Does not provide support for outflows of portfolio investment

Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income, and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

■ **Score: 4.1**

■ **Rank: 13**

Strengths

- Large number of immigrants from developing countries entering Ireland (rank by share of population: 8)

Weaknesses

- Small share of foreign students from developing countries (47%; rank: 18)
- Only a small increase during the 1990s in the number of unskilled immigrants from developing countries living in Ireland (rank by share of population: 14)
- Tuition for foreign students higher than for nationals

Environment

Rich countries use a disproportionate amount of scarce resources, and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

■ **Score: 7.4**

■ **Rank: 5**

Strengths

- Greenhouse gas emissions grew little in 1999–2009 despite rapid GDP growth (average annual growth rate/GDP, -4.7%; rank: 3)
- Low fossil fuel production rate per capita (0.0 tons of carbon dioxide equivalent; rank: 1)

Weaknesses

- High greenhouse gas emissions rate per capita (13.1 tons of carbon dioxide equivalent; rank: 19)
- Poor compliance with mandatory reporting requirements under multilateral environmental agreements relating to biodiversity (rank: 21)
- High fishing subsidies (\$1.50 per person; rank: 16)

Security

Since security is a prerequisite for development, the CDI rewards contributions to internationally sanctioned peacekeeping operations and forcible humanitarian interventions, rewards military protection of global sea lanes, and penalizes arms exports to poor and undemocratic governments.

■ **Score: 5.2**

■ **Rank: 10**

Strengths

- Few arms exports to poor and undemocratic governments (rank by share of GDP: 5)

Weaknesses

- No protection of global sea lanes

Technology

Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

■ **Score: 4.0**

■ **Rank: 21**

Strengths

- No government R&D expenditure on defense

Weaknesses

- Low government expenditure on R&D (rank by share of GDP: 19)
- Allows patents on plant and animal varieties
- Offers patent-like proprietary rights to developers of data compilations, including those assembled from data in the public domain

Background Papers and Contributors

See “The Commitment to Development Index: 2011 Edition” by David Roodman, available at www.cgdev.org/cdi. The website also has background papers for each policy area: David Roodman on foreign aid, William R. Cline on trade, Theodore H. Moran on investment, Elizabeth Grieco and Kimberly A. Hamilton on migration, Amy Cassara and Daniel Prager on environment, Michael E. O’Hanlon and Adriana Lins de Albuquerque on security, and Keith Maskus on technology.

South Korea	22	1.0	2.8	5.9	1.0	2.8	1.7	6.8	3.1	n/a

This table ranks the 22 countries in the CDI, showing their scores in seven policy areas. A country's overall score is the average of its seven policy scores. The final column shows the change in each country's overall score since the CDI began in 2003, using 2011 methodology.

The CGD website (www.cgdev.org/cdi) has reports on each of the 22 countries in the CDI, as well as graphs, maps, spreadsheets, and background papers.

The Commitment to Development Index is designed by the Center for Global Development, an independent think tank that works to reduce global poverty and inequality by encouraging policy change in the United States and other rich countries through rigorous research and active engagement with the policy community.

David Roodman, the architect of the Commitment to Development Index, is a senior fellow at the Center for Global Development.
