U.S. policies have a huge impact on development, and more successful development is crucial to U.S. goals. But development is often oddly missing in the U.S. political debate.

Will global development be mentioned in President Bush's final State of the Union address? What about security, poverty, malaria? Given the rising concern about global warming, will the president break with past practice and mention it for the first time? CGD's handy State of the Union bingo cards can help you to evaluate tonight's State of the Union speech.
