Performance incentives for global health : potential and pitfalls / Rena Eichler, Ruth Levine and the Performance-Based Incentives Working Group.

p. ; cm.

Includes bibliographical references.

Summary: "Describes the rationale for introducing incentives tied to achievement of specific health-related targets, and provides guidance about designing, implementing, and evaluating programs that provide incentives to health care providers and patients. Presents case studies that focus on recent uses of incentives addressing a range of health conditions in diverse countries"—Provided by publisher.
