

# Australia

David Roodman and Selvin Akkus

*The Commitment to Development Index (CDI) ranks 21 of the world's richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national effort in seven policy areas that are important to developing countries: aid, trade, investment, migration, environment, security, and technology. This report reviews Australia's performance on the 2007 CDI.*

## Australia's 2007 CDI Performance

- Overall rank 2007: 5
- Overall score 2007: 5.6
- Change since 2003: -0.3  
(using 2007 methodology)

*Australia ranks 5th overall in 2007. Australia's score is driven by its leading role in peacekeeping efforts, low trade barriers against developing country exports, and relatively open migration policies. On the negative side, Australia gives only a small share of its income in foreign aid, has the highest greenhouse gas emissions rate per person, and, along with the United States, is one of only two CDI countries that have not ratified the Kyoto Protocol.*

## Commitment to Development Index 2007

## Australia's CDI Performance, 2003-2007

## Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes “tied” aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively uncorrupt recipients, and penalizes overloading poor governments with many small projects.

- **Score: 3.1**
- **Rank: 13**

### Strengths

- Large amount of private charitable giving attributable to tax policy (rank by share of GDP: 2)

### Weaknesses

- Low net aid volume as a share of the economy (0.24%; rank: 13)
- Large share of tied or partially tied aid (19%; rank: 15)

## Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries.

- **Score: 6.7**
- **Rank: 3**

### Strengths

- Low tariffs on agricultural products (0.5% of the value of imports; rank: 1)
- Low agricultural subsidies (equivalent to 10.9% tariff; rank: 5)

### Weaknesses

- High barriers against textiles (14.6% of the value of imports; rank: 21)
- High barriers against apparel (21.7% of the value of imports; rank: 21)

## Investment

Rich-country investment in poorer countries can transfer technologies, upgrade management and create jobs. The CDI includes a checklist of policies that support healthy investment in developing countries.

- **Score: 7.6**
- **Rank: 5**

### Strengths

- Provides insurance against political risk for both domestic and foreign firms
- Employs tax-sparing arrangements to prevent double taxation of corporate profits earned abroad
- Provides support for design of securities regulations and institutions in developing countries

### Weaknesses

- Political risk insurance also given to inefficient, import-substituting projects
- Does not provide official support for outflows of portfolio investment

## Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

- **Score: 6.5**
- **Rank: 5**

### Strengths

- Large increase during the 1990s in the number of unskilled immigrants from developing countries living in Australia (rank by share of population: 3)
- Large share of foreign students from developing countries (83%; rank: 4)

### Weaknesses

- Bears small share of the burden of refugees during humanitarian crises (rank: 12)
- Tuition for foreign students higher than for nationals

# Environment

Rich countries use a disproportionate amount of scarce resources, and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

■ **Score: 4.3**

■ **Rank: 19**

## Strengths

- Few imports of endangered species (rank: 2)

## Weaknesses

- High greenhouse gas emissions rate per capita (26 tons of carbon dioxide equivalent; rank: 21)
- Low gas taxes (\$0.38 per liter; rank: 19)
- Has not ratified the Kyoto Protocol on climate change
- High fishing subsidies per capita (\$3.20 per person; rank: 16)

# Security

Since security is a prerequisite for development, the CDI rewards contributions to internationally sanctioned peacekeeping operations and forcible humanitarian interventions, rewards military protection of global sea lanes, and penalizes arms exports to poor and undemocratic governments.

■ **Score: 6.8**

■ **Rank: 2**

## Strengths

- Significant financial and personnel contributions to internationally sanctioned peacekeeping and humanitarian interventions over last decade (rank by share of GDP: 3)

## Weaknesses

- No protection of global sea lanes

# Technology

Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

■ **Score: 4.6**

■ **Rank: 15**

## Strengths

- No attempt to incorporate into bilateral free trade agreements “TRIPS-Plus” measures that would restrict the flow of innovations to developing countries

## Weaknesses

- Allows patents on plant and animal varieties
- Allows patents on software programs

This table ranks the 21 countries in the CDI, showing their scores in seven policy areas. A country's overall score is the average of its seven policy scores. The final column shows the change in each country's overall score since the CDI began in 2003, using 2007 methodology.

The CGD website ([www.cgdev.org/cdi](http://www.cgdev.org/cdi)) has reports on each of the 21 countries in the CDI, as well as graphs, maps, spreadsheets and background papers.

The Commitment to Development Index is designed by the Center for Global Development, an independent think tank that works to reduce global poverty and inequality by encouraging policy change in the United States and other rich countries through rigorous research and active engagement with the policy community.

David Roodman, the architect of the Commitment to Development Index, is a research fellow at the Center for Global Development.
