

Violence Against Children In and Around Schools in Mali

Violence against children is preventable, and the education sector can play a critical role in driving change through schools and school systems. This note summarizes the state of school related violence in Mali, and highlights key data gaps.

Bullying

Bullying refers to repeated emotional or physical aggressive behaviours including any form of isolating, rejecting or excluding from a group, or hitting, kicking, pushing by peers. Bullying data is not available.¹

Sexual Violence

Sexual violence takes different forms, and includes non-consensual completed or attempted sexual contact or acts of a sexual nature that do not involve physical contact, and any form of coercion into sexual situations. Available data indicates that 10% of females aged 15 to 19 **experienced sexual violence in their lifetime**, with almost none of these incidents perpetrated by teachers in 2018. Data for boys is not available.²

Corporal Punishment

Corporal punishment refers to any form of punishment involving physical force intended to cause pain or discomfort.

Is corporal punishment banned in these settings...⁴

Data Gaps

DHS (2012, 2018) provides sexual violence data. **MICS 2015** provides data on corporal punishment by caretakers. MICS can be broken down by disability status, while other data cannot be disaggregated by LGBT+ or disability status.⁵ The table below denotes available data.

| Type of Violence | Aged 6 to 12 | Aged 13 to 22 | 2008 - 2012 | 2013 - 2018 | 2019 or after |
|----------------------------------|--------------|---------------|-------------|-------------|---------------|
| Physical (Peers) | | | | | |
| Emotional (Peers) | | | | | |
| Sexual (Peers) | | | | | |
| Sexual (Teachers) | | ✓ | | DHS | |
| Corporal Punishment (Teachers) | | ✓ | | DHS** | |
| Corporal Punishment (Caretakers) | | | | | |

Mali

Compared to Other Countries

The graphs below include only countries with data from the same international survey, which means the data were collected from children of similar ages using the same questions. **Below are country averages.**

Bullying data is not available

Sexual Violence is...

3 percentage points higher than the Sub-Saharan Africa average, and 4 percentage points higher than the average for low- and middle-income countries with data.

DHS 2018 (+/-) 3 years

Corporal Punishment (Teachers)

Corporal Punishment (Caretakers)

Children Aged 1 to 14 who experienced corporal punishment (%) - MICS 5

Notes

- International surveys cover different forms of violence and do not use a standard definition of violence.
- This brief covers international survey data. We recommend complementing it with national surveys (e.g., household surveys) when available.
- The violence figures included in this brief are likely an underestimate, as many victims do not disclose their experiences of violence.⁶
- Country comparisons created with DHS, VACS, and GSHS data, include low- and middle-income countries within +/- 3 years of Mali's survey round. Graphs created with MICS, TIMSS, PIRLS, PISA, PISA-D, and ERCE, include low- and middle-income countries with data on the same survey round.

Sources

- Examples of surveys that include questions on bullying are PIRLS, PISA, TIMSS, and GSHS.
- Calculations using DHS 2018. Surveys women aged 15 - 19. While DHS asks about teacher and peer perpetrators of physical violence, we exclude from our analysis as the age range does not reflect the period when children are most likely to experience corporal punishment. If the focus is on physical violence against women by teachers starting at age 15, DHS data can provide relevant insights.
- Calculations using MICS 2015.
- [End Corporal Punishment of Children](#), data accessed 2024. Note: "Some" represents cases where prohibition is stated for specific provisions (eg., [forms of corporal punishment or school levels](#)). Alternative Care refers to cases where a child's primary caregiver is not their parents (eg. foster care).
