The Commitment to Development Index (CDI) ranks 27 of the world’s richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national policies in seven areas that are important to developing countries: aid, trade, finance, migration, environment, security, and technology. This report reviews Canada’s performance on the 2013 CDI. For more details, visit cgdev.org/cdi.

Canada ranks 13th overall in 2013. Canada’s main contributions to the development of poor countries come through its low barriers against non-agricultural exports, large share of foreign students from developing countries, few arms exports to poor and undemocratic governments, and a tax policy that encourages private charitable giving. But the Canadian government’s positive impact is reduced by imposing high tariffs on textile, apparel, and dairy, and impediments to importation from developing countries, its relatively small contributions to international peacekeeping efforts, and its poor environmental record from the standpoint of developing countries.

Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes "tied" aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively well-governed recipients, and penalizes overloading poor governments with many small projects.

Score: 3.7
Rank: 14

Strengths
- Large amount of private charitable giving attributable to tax policy (0.02% of GDP; rank: 3)
- Small share of tied or partially tied aid (5.19%; rank: 10)

Weaknesses
- Low net aid volume as a share of the economy (0.32%; rank: 14)
- Allows project proliferation; small average project size (rank: 15)

Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries. It also penalizes costly importation processes and restrictions against purchasing services from foreigners.

Score: 6.0
Rank: 4

Strengths
- Low agricultural subsidies (equivalent to a tariff worth 8.2% of the value of imports; rank: 4)
- No tariffs on rice (0% of the value of imports; rank: 1)
- Low tariffs on sugar (3.6% of the value of imports; rank: 3)
- Low tariffs on beef (13.2% of the value of imports; rank: 4)
- Few days to import a shipping container (4 days; rank: 5)

Weaknesses
- High tariffs on textile (10.4% of the value of imports; rank: 26)
- High tariffs on wheat (41.6% of the value of imports; rank: 24)
- High tariffs on dairy (184.4% of the value of imports; rank: 27)
- Relatively high cost to import a shipping container ($1,610 per container; rank: 27)

Finance

Rich-country investment in poorer countries can transfer technologies, upgrade management, and create jobs. Conversely, policies that permit financial secrecy of companies and banks can facilitate illicit activities and financial flows abroad. The CDI rewards policies that support healthy investment in developing countries and promote transparency in financial transactions at home.

Score: 5.3
Rank: 13

Strengths
- Political risk insurance agency provides wide coverage and screens potential projects for violations of human, labor, and environmental rights
- Active participation and leadership in extractive industries transparency initiatives such as the Extractive Industries Transparency Initiative (EITI) and the Kimberley Process on blood diamonds
- Vigorous prosecution of home-country bribe payers
- Provides assistance to companies looking for investment opportunities in developing countries

Weaknesses
- Scores below average in the Financial Secrecy Index for having few regulations in place to prevent illicit financial transactions within its jurisdiction (rank: 17)

Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income, and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

Score: 7.6
Rank: 3

Strengths
- Large number of immigrants from developing countries entering Canada (rank by share of population: 4)
- Large share of foreign students from developing countries (81.7%; rank: 5)
Environment
Rich countries use a disproportionate amount of scarce resources, and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

Score: 2.6  
Rank: 27

Strengths
- Low tropical timber imports ($4.07 per capita equivalent; rank: 1)

Weaknesses
- High greenhouse gas emissions and fossil fuel production rate per capita (52.2 tons of carbon dioxide equivalent; rank: 25)
- Has not ratified the Kyoto Protocol on climate change
- High fossil fuel production rate per capita (29 tons of carbon dioxide equivalent; rank: 25)
- Low gas taxes ($0.34 per liter; rank: 26)
- High fishing subsidies (rank: 26)
- Poor compliance with mandatory reporting requirements under multilateral environmental agreements relating to biodiversity (rank: 24)

Technology
Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

Score: 5.3  
Rank: 11

Strengths
- High tax subsidy rate to businesses for R&D (rank: 5)
- Restricts copyrighting of databases
- Will force patent holders to license to meet social needs
- Provides patent exceptions for research purposes

Weaknesses
- Low government expenditure on R&D (rank by share of GDP: 19)
- Imposes strict limitations on anti-circumvention technologies that can defeat encryption of copyrighted digital materials

Security
Since security is a prerequisite for development, the CDI rewards contributions to internationally sanctioned peacekeeping operations and forcible humanitarian interventions, military protection of global sea lanes, and participation in international security treaties. It also penalizes arms exports to poor and undemocratic governments.

Score: 5.6  
Rank: 9

Strengths
- Few arms exports to poor and undemocratic governments (rank by share of GDP: 7)

Weaknesses
- Has not ratified the Convention on Cluster Munitions (CCM)
- Low personnel contributions to internationally-sanctioned peacekeeping and humanitarian interventions over last decade (rank by share of GDP: 18)
The above table lists ranks for each of the 27 CDI countries across seven policy areas. The final column shows the change in each country’s overall rank since 2012 (using 2013 methodology).

### About the CDI

The Commitment to Development Index has been compiled each year since 2003 by the Center for Global Development (CGD), an independent think tank that works to reduce global poverty and inequality through rigorous research and active engagement with the policy community. CGD Europe director and senior fellow Owen Barder directs the Index, building on the previous work of CGD former senior fellow David Roodman. Petra Krylova is the CDI coordinator. Collaborators have included William R. Cline on trade; Theodore H. Moran and Petr Janský on finance; Jeanne Batalova, Kimberly A. Hamilton, and Elizabeth Grieco on migration; Amy Cassara and Daniel Prager on environment; Michael E. O’Hanlon, Adriana Lins de Albuquerque, Mark Stoker, and Jason Alderwick on security; and Keith Maskus and Walter Park on technology. The Index is supported by the CDI Consortium.
