The Commitment to Development Index (CDI) ranks 27 of the world’s richest countries based on their dedication to policies that benefit poor nations. Looking beyond standard comparisons of foreign aid flows, the CDI measures national policies in seven areas that are important to developing countries: aid, trade, finance, migration, environment, security, and technology. This report reviews Luxembourg’s performance on the 2013 CDI. For more details, visit cgdev.org/cdi.

Luxembourg’s 2013 CDI Performance

- Overall rank 2013: 4
- Overall score 2013: 6.0
- Change since 2012: 0.1
  (using 2013 methodology)

Luxembourg ranks 4th overall in 2013. Luxembourg’s largest contribution to developing countries is its high-quality foreign assistance program and large share of aid as a proportion of GDP. It also scores well in migration due to a large increase of unskilled migrants from developing countries as a proportion of its population during the 1990s. However, Luxembourg performs poorly on trade, investment, environment, security, and technology. It has large agricultural subsidies that hamper developing country exports, weak support for extractive industry transparency initiatives and peacekeeping, low gas taxes and high greenhouse gas emissions, little support for research and development, and lacks transparency in the financial sector.

Aid

Aid quality is just as important as aid quantity, so the CDI measures gross aid as a share of GDP adjusted for various quality factors: it subtracts debt service, penalizes “tied” aid that makes recipients spend aid only on donor goods and services, rewards aid to poor but relatively well-governed recipients, and penalizes overloading poor governments with many small projects.

Score: 11.9
Rank: 2

Strengths
- High net aid volume as a share of the economy (0.97%; rank: 3)
- Small share of tied or partially tied aid (0.21%; rank: 6)
- Large share of aid to poor and better-governed recipients (selectivity rank: 4)

Weaknesses
- Allows project proliferation; small average project size (rank: 21)

Finance

Rich-country investment in poorer countries can transfer technologies, upgrade management, and create jobs. Conversely, policies that permit financial secrecy of companies and banks can facilitate illicit activities and financial flows abroad. The CDI rewards policies that support healthy investment in developing countries and promote transparency in financial transactions at home.

Score: 3.6
Rank: 25

Strengths
- Strong support to identifying bribery and corrupt practices
- Provides official support for outflows of portfolio investment

Weaknesses
- Political risk insurance agency does not screen projects for violations of local environmental rights
- Weak leadership in extractive industry transparency initiatives
- Does not provide assistance to companies looking for investment opportunities in developing countries
- Scores below average in the Financial Secrecy Index for having few regulations in place to prevent illicit financial transactions within its jurisdiction (rank: 22)

Trade

International trade has been a force for economic development for centuries. The CDI measures trade barriers in rich countries against exports from developing countries. It also penalizes costly importation processes and restrictions against purchasing services from foreigners.

Score: 5.2
Rank: 15

Strengths
- As a member state of the European Union, Luxembourg imposes low tariffs on agricultural products including wheat, dairy, some meats, textiles, and apparel
- Few documents required for importation (7 documents; rank: 6)
- Few days to import a shipping container (4 days; rank: 5)

Weaknesses
- As a member state of the European Union, Luxembourg imposes high tariffs on rice, sugar, and beef
- High agricultural subsidies (equivalent to a tariff worth 17.1% of the value of imports; rank: 25)

Migration

The movement of people from poor to rich countries provides unskilled immigrants with jobs, income, and knowledge. This increases the flow of money sent home by migrants abroad and the transfer of skills when the migrants return.

Score: 6.8
Rank: 7

Strengths
- Large number of immigrants from developing countries entering Luxembourg (rank by share of population: 5)
- Bears large share of the burden of refugees during humanitarian crises (rank: 8)

Weaknesses
- Small share of foreign students from developing countries (21.3%; rank: 26)
Environment
Rich countries use a disproportionate amount of scarce resources, and poor countries are most vulnerable to global warming and ecological deterioration, so the CDI measures the impact of policies on the global climate, fisheries, and biodiversity.

Score: 5.8
Rank: 21

Strengths
- No fishing subsidies (rank: 1)
- Low fossil fuel production rate per capita (0 tons of carbon dioxide equivalent; rank: 1)

Weaknesses
- High greenhouse gas emissions rate per capita (23.5 tons of carbon dioxide equivalent; rank: 23)
- Poor compliance with mandatory reporting requirements under multilateral environmental agreements relating to biodiversity (rank: 25)
- Greenhouse gas emissions grew almost as fast as GDP over the last decade (average annual growth rate/GDP, -1.45%; rank: 23)
- Low gas taxes ($0.71 per liter; rank: 21)

Technology
Rich countries contribute to development through the creation and dissemination of new technologies. The CDI captures this by measuring government support for R&D and penalizing strong intellectual property rights regimes that limit the dissemination of new technologies to poor countries.

Score: 4.1
Rank: 21

Weaknesses
- Low government support for R&D (rank: 19)
- Allows patents on plant and animal varieties
- Pushes to extend intellectual property rights in bilateral trade treaties (“TRIPS Plus” measures) that restrict the flow of innovations to developing countries
- Offers patent-like proprietary rights to developers of data compilations, including those assembled from data in the public domain

The above table lists ranks for each of the 27 CDI countries across seven policy areas. The final column shows the change in each country’s overall rank since 2012 (using 2013 methodology).

### About the CDI

The Commitment to Development Index has been compiled each year since 2003 by the Center for Global Development (CGD), an independent think tank that works to reduce global poverty and inequality through rigorous research and active engagement with the policy community. CGD Europe director and senior fellow Owen Barder directs the Index, building on the previous work of CGD former senior fellow David Roodman. Petra Krylova is the CDI coordinator. Collaborators have included William R. Cline on trade; Theodore H. Moran and Petr Janský on finance; Jeanne Batalova, Kimberly A. Hamilton, and Elizabeth Grieco on migration; Amy Cassara and Daniel Prager on environment; Michael E. O’Hanlon, Adriana Lins de Albuquerque, Mark Stoker, and Jason Alderwick on security; and Keith Maskus and Walter Park on technology. The Index is supported by the CDI Consortium.
