

Economic Development
IAFF 238
Fall 2008
Mondays 5:10-7pm
Corcoran Hall (725 21st St, NW), Room 111
Version September 5, 2008

Instructor : Nora Lustig, Shapiro Visiting Professor of International Affairs
Office : Suite 502C, Elliott School, 1957 E Street
Office Hours : Mondays 3-4:45pm and by appointment
Telephone : (202) 994-5289
E-mail : nlustig@gwu.edu

Description:

This course will analyze the economic challenges faced by low and middle-income countries in their quest for development. The course will be divided into three sections. In the first section, we will address the challenges of economic growth. Focusing on specific countries, we will examine what causes some development strategies to succeed and others to fail. In particular, we will focus on the role played by the *government* (i.e., state-ownership, macroeconomic policy - fiscal stance, interest rate and exchange rate, and microeconomic incentives - property rights, coordination, regulation, subsidies and public goods), *economic openness* (i.e., trade and capital account liberalization and economic integration), and *multilateral lending institutions and foreign aid* in fostering development. In the second part of the course, we will address the challenges of generating equitable growth. After examining the trends in poverty and inequality in specific regions and countries, we will analyze which development strategies and government policies result in more equitable outcomes. In the final portion of the course, we will focus on the causes and consequences of one of today's key development challenges: rising food prices.

Students registered in this course should have taken introductory courses in microeconomics and macroeconomics. Although the course will be non-technical, the readings and in-class discussion will assume basic knowledge of economic concepts and theories used to analyze the challenges facing developing countries as well as the policies proposed to address them.

Organization of the Course

The course will be conducted as a seminar. Each week the instructor will devote part of the session to introduce the subject. Subsequently, pre-assigned groups will be asked to lead the discussion by summarizing the week's reading, offering an analysis of the main arguments and conclusions, and posing some questions for the class to ponder. Careful and critical reading of the required texts is a major component of this course.

Assignments

A final research paper (8,000-10,000 words) on one of the subjects covered in the course will be due on December 8. While the paper must draw upon the material discussed in class, it should also include additional material, reflecting the student's own geographic, disciplinary, and theoretical interests. Each student is expected to give a brief presentation outlining the topic and reporting on findings and conclusions at the end of the course.

Grades

Group presentations	40 percent
Final paper and individual presentations	50 percent
Participation and attendance	10 percent

Recommended Texts (on reserve and available at GWU's bookstore or online shopping)

1. Nancy Birdsall, Augusto de la Torre and Rachel Menezes *Fair Growth: Economic Policies for Latin America's Poor and Middle Income Majority*, Brookings Institution Press, 2008.
2. Paul Collier *The Bottom Billion*, Oxford University Press, 2007.
3. Nora Lustig *Mexico. The Remaking of an Economy*, Second Edition, Brookings Institution Press, 1998.
4. Todd J. Moss *African Development*, Lynne Rienner Publishers, 2007.
5. Barry Naughton. *The Chinese Economy. Transitions and Growth*, MIT Press, 2007
6. Arvind Panagariya *India. The Emerging Giant*, Oxford University Press, 2008.
